MANAGED FOREX ACCOUNTS

We have worked with managed accounts for a number of years. It is with this experience we have structured and developed our automated trading and a bespoke managed account offering and established a market leader in respect of return to risk.

Using our extensive knowledge of how managed accounts operate, and how they are structured, offers our client's something unique. Our service has been developed with Traders who manage our client funds and manage risk. They offer a professional and disciplined approach to discretionary FX trading, managing FX accounts on behalf of our clients with a high level of transparency and protection

Our team combine experience, proven strategy and state of art technology to ensure risk is managed and that consistent levels of profit are made regardless of market sentiment

The main difference between our Platform and others out there is that we can offer a gold standard in terms of the returns, transparency and security.

A Managed FX Account allows our qualified professional traders to work on behalf of our clients. They will take advantage of the market and our clients benefit from their ability to create profit. This option helps clients to reduce risk and unnecessary exposure from what can be a volatile market.

DIVERSIFICATION

This is a crucial element of portfolio management and this has become increasingly evident during the market turmoil seen in recent years. Currencies maintain a very low correlation to other investments including; equities, bonds and commodities. Our clients are provided greater overall diversification and reduced portfolio risk

**IT'S NOT JUST ABOUT
RETURN ON CAPITAL;
IT IS ALSO ABOUT
RETURN OF CAPITAL.**

ETHICAL FOREX TRADING WITH ALPHA

Foreign Exchange; also known as Forex, FX or Currency Market.

As experienced FX professionals, we pride ourselves on offering our valued clients a range of investment options to suit both the amount they have available to invest and the level of return they wish to receive.

The Foreign Exchange market, also referred to as the 'Forex' or 'FX' market is the largest financial market in the World, with a daily turnover in excess of \$5 trillion which is more than ten times the turnover of all global equity markets combined.

Until recently, the FX market has not been for speculative investors in the retail industry due to the large investment commitment and often stringent financial requirements. Banks, Hedge Funds, Asset Managers, Pension companies and Insurance companies were the principle participants. These large institutional traders had exclusive access to the many benefits offered by the foreign exchange market versus other markets, including the excellent liquidity and the strong trending nature of the World's primary currency exchange rates, which has led to level of \$5 trillion being traded daily.

About 5% of daily turnover is from companies and governments that buy or sell products and services in foreign countries or must convert profits made into foreign currencies into their domestic currencies. The other 95% is traded for profit or speculation.

We value our clients and have an excellent retention record. As part of the bespoke managed account, we will offer clients an opportunity to have access to highly experienced FX trading professionals who can consistently deliver profits. We use a variety of long term and short term strategies to diversify the risk to achieve a consistent level of return

USEFUL INFORMATION: The primary market for currencies is the interbank market which runs 24 hours a day, 5 days a week. It follows the major banking centres of the United States, Asia Pacific and Europe.

THERE IS ALWAYS A TRADING
CENTRE OPEN, ENABLING TRADING
TO TAKE PLACE 24 HOURS A DAY

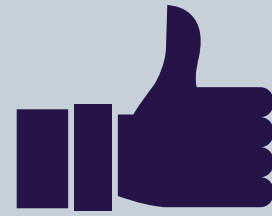

WHAT ARE THE BENEFITS?

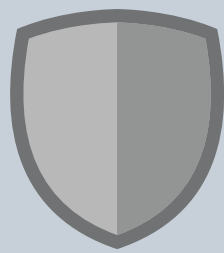

HIGH LEVEL RETURNS

By investing your money in this Platform, you will have direct access to the Forex market. Our trading activity will include your account, and profits will show in your account once trades close. Allowing your profits to compound over the longer term is recommended, for greater growth.

TAX PLANNING

As Forex is classed as spread betting, you have the opportunity to receive your profits tax-free (please consult your tax adviser)

PROTECTION

There is an insurance policy to protect Capital within your account for peace of mind

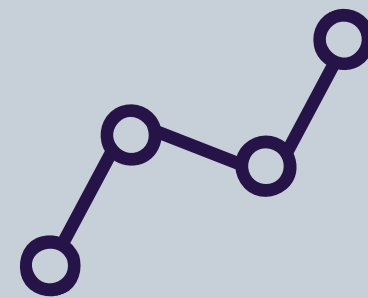

FLEXIBILITY

You can add or withdraw funds at any time so long as you are aware of the open trades that may exist in your account. We ask all clients to contact us first, prior to making any withdrawals.

SECURITY

Our Broker is regulated by CySEC, and holds global licenses for added security. It also falls in line with the industry standard MiFID II (Markers in Financial Instruments Directive) policy.

PASSIVE INVESTMENT

This investment requires none of your time and it is a passive, arm chair investment. Allowing you to sit back, relax and enjoy the profits.

EXPERTISE

Your investment is managed and administered by professional traders

TRANSPARENCY

We do not handle your money, your investment sits within your own account on the Platform so you are in full control and can see what is happening 24/7.

BE IN CONTROL OF YOUR WEALTH

Automated Trading System

Our Automated Trading System gives clients direct access to the Forex market, via our trade copier system which has an excellent and verified track record having been used by market professionals for many years. With a low minimum investment, this opportunity is a great way for investors to get a feel for the market and its mechanisms and in return, receive some potentially strong returns.

Minimum Investment: £1,000.

Risk Level: Medium - High

Bespoke Managed Service

Our Bespoke Managed Service also gives clients direct access to the Forex market, where a team of hand picked highly skilled traders with outlined experience will manage the trades. Our team have strict trading rules and conditions that they have to stick to, this allows for consistent growth over the long term. All our traders and automated systems are verified with track records to prove the outstanding results.

Minimum Investment: £10,000

Risk Level: Medium

INVESTORS RISK WARNING:

Our team of traders and our automated service trade in an extremely cautious manner and follow a strict 5 stage risk assessment. This ensures your funds are protected to the highest possible level. However, your capital is at risk and the value of your investment can go down as well as up. Historic trading performance is no indication of future performance. You should consider your investment objectives, financial situation and level of experience when investing. These types of products are suited to investors who fully understand the risks.
